Introduction to Cybersecurity

Everton de Oliveira Soares

AI & Automation Engineer | Cloud Automation & Autonomous Systems

São Paulo, Brazil - Open to Remote Contractor Roles

PROFESSIONAL SUMMARY

AI and Automation Engineer with hands-on experience designing and deploying end-to-end autonomous systems, including multi-provider LLM integrations, browser automation, multi-instance WhatsApp platforms, data pipelines, cloud-hosted agents, and real-time dashboards. Skilled in Python, Docker, Linux, Oracle Cloud, API orchestration, SQLite/PostgreSQL, and reliability controls. Eight years of experience in financial markets and quantitative analysis. Currently expanding cloud, DevOps, and AI engineering expertise through AWS and IBM professional programs.

PROFESSIONAL EXPERIENCE

Founder & Lead Developer

2025 - Present

GrowthTech Solutions - AI-Powered B2B Automation Agency

- Architected and implemented an autonomous WhatsApp SDR platform using Evolution API v2, Docker, SQLite WAL, and Gemini 2.5 Flash for automated lead qualification.
- Designed, deployed, and validated a Telegram-controlled autonomous AI operations platform on Oracle Cloud with persistent Linux services, browser automation, and multi-provider LLM failover.
- Developed a Flask Command Center dashboard for chip management, AI controls, sales pipeline visibility, and real-time operational history.
- Built an Apify and Google Maps lead pipeline with normalization, deduplication, and database ingestion, processing more than 3,500 leads.
- Implemented controlled browser agents for content workflows, trend research, scraping, and job discovery using Playwright and deterministic safety checks.
- Integrated REST APIs, webhooks, Cloudflare, Hostinger, Stripe, and PayPal to support hosting, DNS, security, checkout, and recurring billing workflows.

Proprietary Trader & Crypto-Asset Analyst

2018 - Present

Independent - Forex, Equities, and Digital Assets

- Designed and validated quantitative trading strategies for crypto assets, Brazilian equities, and Forex proprietary trading programs.
- Researched blockchain networks, smart contracts, yield farming, decentralized exchanges, and GameFi ecosystems.
- Combined quantitative finance with AI-powered automation to support research and decision-making workflows.

EDUCATION

- ▶ Aircraft Maintenance Technician
- ▶ Brazilian Driver's License - Categories A and D

PROJECTS & PORTFOLIO

 Autonomous AI Operations Platform

Designed and deployed a Telegram-controlled AI orchestration platform on Oracle Cloud. Hermes interprets natural-language requests while deterministic Python and Bash controllers run scheduled workflows across LinkedIn, Wellfound, and InfoJobs, including content operations, job discovery, saving, controlled applications, and unsupported-form review. Isolated Chromium profiles, persistent systemd and cron services, execution locks, SQLite ledgers, JSON and SHA-256 evidence reports, and four-tier OmniRoute LLM failover provide reliability, auditability, and cost-aware availability.

Oracle Cloud · Ubuntu · Hermes Agent · OmniRoute · Docker · Python · Bash · Playwright · Chromium CDP · Telegram · systemd · Cron · SQLite · Multi-LLM Routing

 AI WhatsApp SDR Bot

Autonomous multi-instance B2B sales bot with LLM lead qualification, safe message controls, template rotation, and persistent Docker services.

Python · Flask · Evolution API v2 · Docker · SQLite WAL

 Autonomous Browser Agents

Controlled agents operating real Chromium sessions for content workflows, research, scraping, and job discovery with deterministic execution limits.

Playwright · Python · OpenRouter · LLM Decision Engine

 Command Center Dashboard

Real-time operations dashboard for instance management, AI controls, sales pipeline monitoring, and execution history.

Flask · HTML/CSS/JS · SQLite · REST API

 B2B Lead Data Pipeline

Automated lead extraction from Apify and Google Maps with Brazilian phone normalization, deduplication, and bulk database ingestion.

Python · Apify · Pandas · CSV/SQL · 3,500+ leads
